Facebook Open Search

Let face it dude...

September 08, 2007

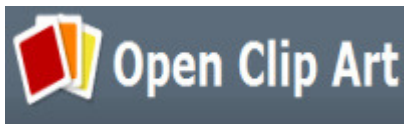

Early this morning, Facebook announced that it is making its database of users searchable by nonmembers. This reduces, slightly, the amount of privacy people have on the social network, but it also adds a great deal of utility to the service and reflects Facebook's growing dominance as the Web's white pages.

Open Office

Free office suite save money

September 06, 2007

OpenOffice.org is an open-source, multiplatform and multilingual office suite comparable with MS Office. It is compatible with all other major office suites and is free to download, use, and distribute. It was previously known as StarOffice before it became an open-source project.

OpenOffice suite comes with six powerful programs:

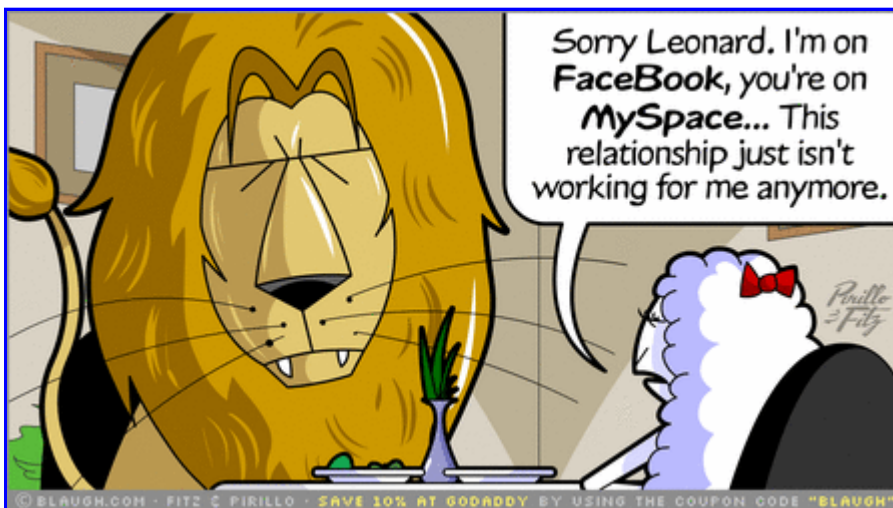

1. **Writer**- A word processor you can use for anything from writing a quick letter to producing an entire book.
2. **Calc** - A powerful spreadsheet with all the tools you need to calculate, analyse, and present your data in numerical reports or sizzling graphics.
3. **Impress** - The fastest, most powerful way to create effective multimedia presentations.
4. **Draw** - Lets you produce everything from simple diagrams to dynamic 3D illustrations.
5. **Base** - Lets you manipulate databases seamlessly. Create and modify tables, forms, queries, and reports, all from within OpenOffice.org
6. **Math** - Lets you create mathematical equations with a graphic user interface or by directly typing your formulas into the equation editor.

UD Pixel**Genius idea!**

September 02, 2007

Can LCD dead pixel able to fix? This program helps to locate and fix LCD screens dead pixels. You can fix the stuck pixels by calling them to do rapid changes. You need to run this program for a couple of hours. There is no warranty on the result, but you don't really have anything to lose trying it out. Good luck.
