Drinkers Cancer Risk

Alcohol as always the culprit..

Today, August 11, 2007

Drinking a large glass of wine or a pint of beer a day increases the risk of developing bowel cancer by around 10 per cent, says a report quoted by DailyMail.co.uk. And drinking around two pints a day or around two large glasses of wine increases the risk by 25 per cent, a study found.

Gmail Going Huge : 9GB+

Google challenges..

August 11, 2007

Reports we are getting in the mail say that some Gmail users have seen their storage bumped to over 9GB today - 9030MB, to be exact. If not a glitch (and why would it be?), it means Google is playing catch-up with Yahoo, which now provides unlimited storage. With no other info, we can only assume the accounts are currently being selected at random.

Adobe Reader SpeedUp

Vrooom....

August 07, 2007

It is a simple application that was created to help make the loading time of Adobe's Acrobat Reader software bearable for everyday use. AR SpeedUp only needs to be used once a process taking only a few seconds and then your 'Reader will be transformed forever. There are also some tweaking options available. "w00t!", as the young kids say. Compatible for all window version, included Window Vista!

Memorial Of Atomic Bomb

Atomic, nuclear, hydrogen, nuclear power plant or whatever, they are the same

August 06, 2007

<http://www.youtube.com/watch?v=12zd5oDb8TM>

My god, what have we done? - Robert Lewis, the co-pilot of the Enola Gay, the B-29 that dropped the first atomic bomb.

FAMOUS QUOTES OF A CENTURY

by Professor Albert Einstein (22 January 1947):

I do not know with what weapons World War 3 will be fought, but World War 4 will be fought with sticks and stones

Through the release of atomic energy, our generation has brought into the world the most revolutionary force since prehistoric man's discovery of fire. This basic force of the universe cannot be fitted into the outmoded concept of narrow nationalisms.

For there is no secret and there is no defense; there is no possibility of control except through the aroused understanding and insistence of the peoples of the world.

We scientists recognise our inescapable responsibility to carry to our fellow citizens an understanding of atomic energy and its implication for society.

In this lies our only security and our only hope, we believe that an informed citizenry will act for life and not for death.
