The Newsletter

Tribute To Starlancer

My memories of great pcgames.

November 17, 2007

Check the video @ <http://www.youtube.com/watch?v=2dArJqU-7fU>

I love the 90s game programmer they really produce awesome gameplay and storyline...

Spybot Search Destroy

Kill spyware before they kill you

November 16, 2007

Spybot - Search and Destroy detects and removes spyware, a relatively new kind of threat not yet covered by common anti-virus applications. Spyware silently tracks your surfing behaviour to create a marketing profile for you that is transmitted without your knowledge to the compilers and sold to advertising companies.

If you see new toolbars in your Internet Explorer that you haven't intentionally installed, if your browser crashes inexplicably, or if your home page has been "hijacked" (or changed without your knowledge), your computer is most probably infected with spyware.

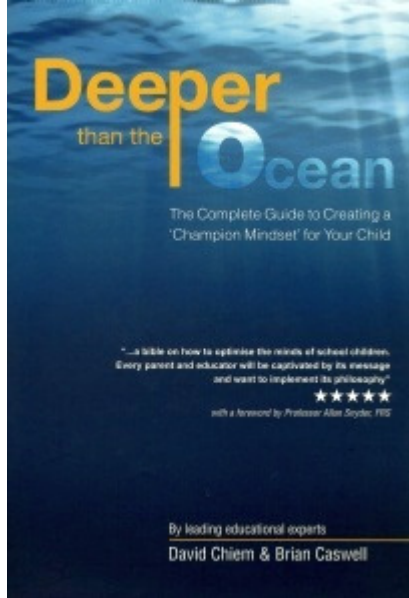

Even if you don't see the symptoms, your computer may be infected, because more and more spyware is emerging. Spybot-S&D is free, so there's no harm giving it a try to see if something has invaded your computer.

Deeper Than The Ocean

Open once soul is deeper than the ocean

November 15, 2007

A parent's love is deeper than the ocean...

*How do we prepare our children for life in the 21st Century?
What is really happening inside the learning brain?
What is the champion mindset and how do I instil it in my child?*

It is a common complaint that children do not come with instruction manual. And how many of us have the time to undertake the thousands of hours of research to keep up with the latest science?

Hailed as 'a great leap forward', Deeper than the Ocean equips us with the knowledge and the tools to take our parenting and teaching skills to an entirely new level.

Here, at last, is the instruction manual you have always wanted. The complete guide to successful parenting and teaching.

Where Are You Going, Mister!

New things to do with your kid pc

November 14, 2007

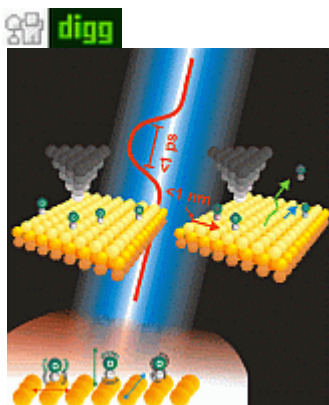

The new feed for your kids.

New Laser Could Cure AIDS

Breakthrough of nano technology

November 13, 2007

You may have been thrilled by the spectacular fights with laser weapons in the "Stars War". But our worst enemies cannot be cut with a laser sword...heck, we can't even see them!

Bacteria and viruses have killed more humans than any other factor did along history. And if a cure against HIV and other plagues of the 21st century is the focus of many scientific researches nowadays, here comes the laser: this technology could provide the solution.

Kitchen Myth

Urban legend in a kitchen

November 12, 2007

We've all heard of urban legends, those plausible sounding but false stories that circulate so widely on email and news groups, such as the old lady who microwaved her cat or the Nieman-Marcus \$250 cookie recipe. There are several web sites devoted to researching and exposing these fake stories. The same sort of thing happens in the world of food and cooking, although on a much smaller scale.

This page is my answer. How do I know these are myths? Why should you believe me over someone who says that something I call a myth is in fact true? I can't answer that question for you but I can say that all of the information on this page has been carefully researched.

XIOS By Xcerion

New concept on Operating System

November 11, 2007

Xcerion is a company providing an Internet OS as a free service over the Internet. The OS called, Xcerion XML Internet OS/3 (XIOS/3) enables a networked and collaborative experience with applications utilizing the potential of the Internet. Applications may be developed in weeks instead of years using Xcerions new XML languages for development. The OS is created for desktop applications for both consumers and businesses.

Checkout video @ <http://www.youtube.com/watch?v=BlzfmaoO6GA>

For your information, Xcerion is a Swedish Internet startup whose founders include ex-Microsoft employees Lou Perazzoli and John Connors. The company will make headlines later this year when they officially unveil what they call an "Internet OS" dubbed XIOS that runs in a web browser. We took an early look at the XIOS concept and had the chance to talk about the project with the company's CEO, Daniel Arthursson.
