Nice try giant mantis...

Miracle Of Creation In DNA**What is beyond DNA?**

30 Nov 2007

The progress of science makes it clear that living beings have an extremely complex structure and an order too perfect to have come into being by coincidence. This is evidence to the fact that living beings are created by an All-Powerful Creator with superior knowledge.

Recently, for instance, with the unravelling of the perfect structure in the human gene-which became a prominent issue due to the Genome Project-the unique creation of God has once more been revealed for all to see.

This book is author by Dr Harun Yahya from Turkey. In fact I've learn a lot from his books. All the books I've read are colorful well illustrated and easy understanding.

Download this book for free in PDF @ http://www.harunyahya.com/c_design_nature.php

Please visit the main site for more @ <http://www.harunyahya.com>

Secret Beyond Matter**Its a trial world, just think very deeply**

29 Nov 2007

What is explained in this web site is an important truth, which has surprised many and changed their perspectives on life. This truth can be summarized as follows: "All events and objects that we encounter in real life-buildings, people, cities, cars, places-in fact, everything we see, hold, touch, smell, taste and hear-come into existence as visions and feelings in our brains".

We are taught to think that these images and feelings are caused by a solid world outside of our brains, where material things exist. However, in reality we never see real existing materials and we never touch real materials. In other words, every material entity which we believe exists in our lives, is, in fact, only a vision which is created in our brains.

This is not a philosophical speculation. It is an empirical fact that has been proven by modern science.

Today, any scientist who is a specialist in medicine, biology, neurology or any other field related to brain research would say, when asked how and where we see the world, that we see the whole world in the vision center located in our brains.

This fact has been scientifically proven in the twentieth century, and although it may seem surprising, it necessarily implies answers to two questions; "If our lives are visions created in our brains, then who is it that creates these visions? And who is it that sees these visions in our brains without having eyes and enjoys them, gets excited and happy?" You will find the answers to these two important questions in this site.

Google or microsoft?

Stroke Center

See how much you know about stroke

27 Nov 2007

The Internet Stroke Center is a non-profit, educational service of the Stroke Center at Barnes Jewish Hospital, Washington University Medical Center and the Cerebrovascular Diseases Section of the Department of Neurology at Washington University School of Medicine in St. Louis.

The Internet Stroke Center exists to advance understanding of stroke research and clinical care. Our goal is to provide current, professional, unbiased information about stroke. The information on this site is obtained from published accounts, meeting presentations, internet searches, and direct correspondence.

We always welcome contributions from others at Washington University and elsewhere. If you have information about a stroke center, web site, clinical trial, symposium, or postdoctoral fellowship opportunity — please let us know about it. However, our site does not host or receive funding from advertising or from the display of commercial content.

Visit the site @ www.strokecenter.org

Unreal Tournament 3

Its call unreal because its unreal

26 Nov 2007

Check out video review @ http://media.pc.ign.com/media/746/746632/vid_2209298.html

It's not something we expected to say, but we're going to have to limit our Unreal Tournament 3 preview somewhat to prevent, wait for it, spoilers. Spoilers of the narrative variety, that is. There's actually a plot in this game, following a character named Reaper. He had his colony wiped out by a fearsome alien race known as the Necris.
